

# Brand and Signage Guidelines

Revised: May 27th 2014

Abbott Marshlands

The Identifier

This is the Abbott Marshland Identifier. It is the centerpiece of the organization’s brand identity. Its customized typographic design, hand drawn icons and colors reflect the unique character of the organization. Over time, the frequent and consistent use of the Identifier will build equity in the Abbott Marshland brand. Do not modify or alter the Identifier in any way.

The identifier is comprised of five rectangles, one containing the name of the organization and four containing icons representing aspects of interest within the park.

The five rectangles must always be used as a unit, never separated and used individually or in different groupings for any purpose.

Primary Identifier

The full color version is the primary identifier and should be used whenever possible.

Secondary Identifiers

The secondary identifiers should be used only on rare occasions.

**Grayscale Version**  
Should be used only when color reproduction is not possible, but when halftone reproduction is possible (e.g. newspaper advertising).

**Black & White Version**  
Should be used only when neither color nor halftone reproduction are available.

**Reverse Version — Color**  
This version should be used only when the identifier must go on a very dark background.

**Reverse Version — Grayscale**  
This version should be used only when the identifier must go on a very dark background and color reproduction is not available.

Area of Isolation

To ensure that the eye is drawn to the Identifier, it is important that it be isolated on the page from other visual elements. A minimum amount of clear space should be maintained around the Identifier to ensure optimum legibility and emphasis. This area of isolation, identified below by the letter X, is based on the hight of the “M” in “MARSHLAND”. The minimum area of isolation is the X distance around the Identifier. Keep this area free of other imagery, graphic elements, typography, folds and page trim. These guidelines apply to all Identifier usage. A more generous area of isolation is usually preferred.

Minimum Size

To ensure the legibility of both the lettering and the icons, the identifier should never be reproduced smaller than .75 inches wide.

# Colors

The consistent use of color is another important element of the Abbott Marshland visual brand. The primary and secondary color palettes shown here have been selected to represent key attributes of the park. Limiting ourselves to these colors ensures that our materials will always be harmonious and consistent.

### Primary Colors

The primary colors are those of the Abbott Marshland identifier.

Abbott Marshlands

Typography

The consistent and harmonious use of typography is one of the primary elements of our visual identity. The fonts that an organization uses convey a distinct personality, and the way in which the fonts are used further enhances those qualities. Below is a set of guidelines for the use of fonts and typographic style which will unify all of our print and web communications.

Primary Fonts

Our primary fonts are from the Franklin Gothic family, on which the lettering within our identifier is based. Primary fonts should be used as much as possible. Their use is required for all printed material and signage.

Franklin Gothic Book Condensed ITC T

ABCDEFGHIJKLMNOPQRSTUVWXYZ  
abcdefghijklmnopqrstuvwxyz  
1234567890

Available at <http://store1.adobe.com/cfusion/store/html/index.cfm?store=OLS-US&event=displayFont&code=FKGQ70004000>

Franklin Gothic Demi Condensed ITC T

ABCDEFGHIJKLMNOPQRSTUVWXYZ  
abcdefghijklmnopqrstuvwxyz  
1234567890

Available at <http://store1.adobe.com/cfusion/store/html/index.cfm?store=OLS-US&event=displayFont&code=FKGQ70008000>

Fonts for Use on Microsoft Office and Online Applications

Documents meant to be shared, such as Word and PowerPoint files, are most efficient if they are created with fonts that are common to all computers. Our official Microsoft Office font is Arial. These fonts will also be used for all online applications.

Arial Regular

ABCDEFGHIJKLMNOPQRSTUVWXYZ  
abcdefghijklmnopqrstuvwxyz  
1234567890

Arial Bold

ABCDEFGHIJKLMNOPQRSTUVWXYZ  
abcdefghijklmnopqrstuvwxyz  
1234567890

Typographic Style

Typographic style is another important element in the development of the Abbott Marshlands brand. The consistent use of fonts is very important, but consistent spacing, paragraph formatting and use of subheads also contribute to the company’s visual identity.

Following are several typographic specifications whose consistent use will help to unify all Abbott Marshlands communications.

- The preferred formatting for all text is flush left, ragged right (not justified).
- Rather than indenting new paragraphs, it is preferable to leave a double return between paragraphs.
- Main headlines should be set in a size that is significantly larger than the text. They should be in a bold weight in the title case.
- Primary subheadings should be set in all capital letters, in a bold font weight.
- Secondary subheadings should be set in boldface, upper and lower case followed by a single return.
- For bulleted copy, use simple, small round bullets, such as those shown here.
  - Use a hyphen for secondary bullet points.

Main Headline

This is dummy text, this filler text is used so that you can see how a text box would appear. This text is intended for visual reference only and not to be reproduced as actual content. This block of text will now be repeated in the paragraph below.

This is dummy text, this filler text is used so that you can see how a text box would appear. This text is intended for visual reference only and not to be reproduced as actual content. This block of text will now be repeated with a few extra words. This is to give the appearance of a fuller paragraph, with a much more even rag .

PRIMARY SUBHEADING

This is dummy text, this text is positioned so that you can see how a text box would appear. This text is intended for a visual reference

and not to be reproduced as actual text. This block of text will no longer be repeated.

Secondary Subheading

This is dummy text, this text is positioned so that you can see how a text box would appear before the use of a colon:

- This is bullet point number one in the list
- This is bullet point number one in the list and is to show how multiple lines will appear
- This is the final bullet point in the list

Abbott Marshlands

Colors

The consistent use of color is another important element of the Abbott Marshland visual brand. The primary and secondary color palettes shown here have been selected to represent key attributes of the park. Limiting ourselves to these colors ensures that our materials will always be harmonious and consistent.

# Family of Signs

Abbott Marshlands

Family of signs

The newly named Abbott Marshlands facility has undertaken a wayfinding and signage program to extend the branding resolution into the environment. The overall goal is to create a cohesive sense of place to a widely diverse experience, from archeology to bird watching, from kayaking to hiking.

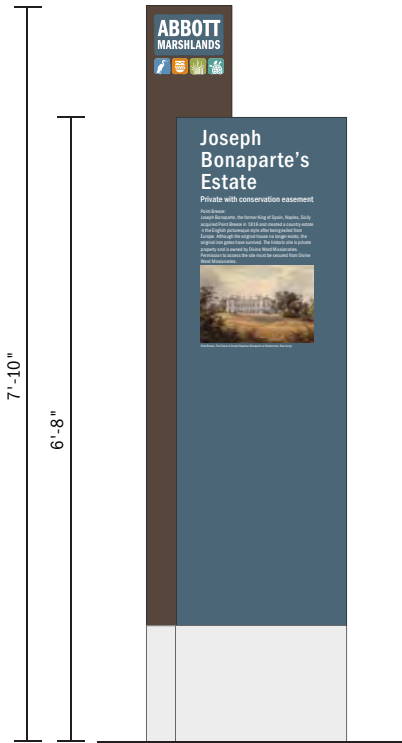

Overall, our mission is to provide a program that will enhance the visitors' experience and awareness of the extent and diversity of Abbott Marshlands in its entirety.

DOT Signs

DOT signs

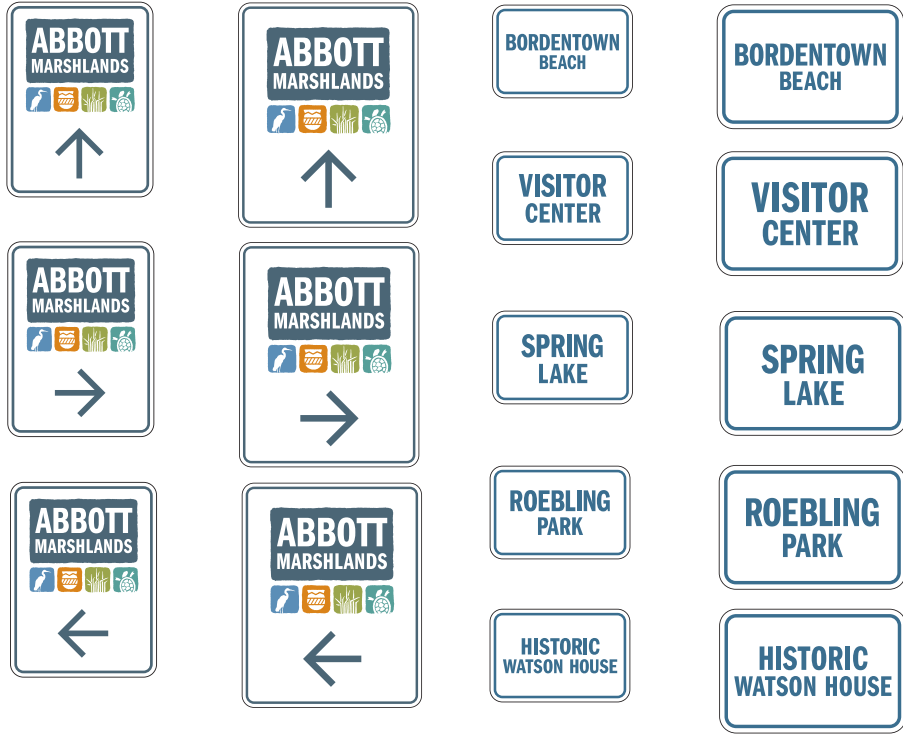

The purpose of these directional signs is to direct visitors, via local streets, to specific destinations of the Abbott Marshlands. The large DOT signs are to be positioned on high traffic routes and the smaller DOT signs are to be used in residential areas where the speed limit and viewing reaction time are decreased.

**Fabrication technique:**  
1/8" thk alloy sheeting, grade 3015  
Artwork digitally printed using 3M™ Piezo Inkjet Ink Series 8800UV directly onto White 3M™ 3930 high intensity prismatic reflective sheeting vinyl.  
Refer to page 2 for approved colors

## Archaeological Considerations

The Abbott Marshlands lies within an area that is one of the richest sources of prehistoric archaeology in the region. A large portion of the marshlands lies within the Abbott Farm National Historic Landmark (AFNHL), a federal and state-recognized historic district. The excavations for sign foundations have the potential to encounter significant archaeological resources. Identification, documentation and protection of archaeological resources should be considered as part of the placement of all signs.

Furthermore, all ground-disturbing projects sponsored or permitted by federal, state or local governments must comply with various laws protecting archaeological resources. In particular, the listing of the AFNHL in the New Jersey Register of Historic Places requires that all public undertakings within the landmark boundaries that may "encroach upon, damage, or destroy" historical or archaeological resources be reviewed in compliance with the New Jersey Register of Historic Places Act. As a matter of course, pertinent regulations should be considered and complied with prior to any sign installation. This may involve consultation with federal or state agencies.

Prior to sign installation, the following steps represent a typical course of action:

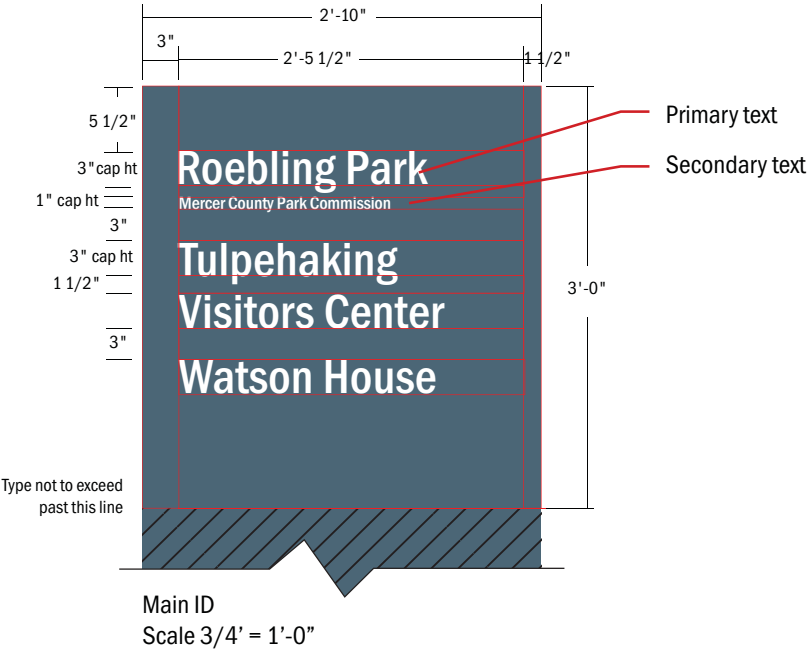

1. Determine if federal, state or local preservation laws apply and whether any agencies or officials need to be consulted. Consult with the agency/official as required and develop an appropriate course of action. If there are any questions, the New Jersey Historic Preservation Office should be contacted for guidance.
2. Consult with a professional archaeologist who meets the qualifications set forth by federal and state laws.
3. The archaeologist should determine if the ground in which the sign is to be placed has been previously disturbed to the full depth of cultural stratigraphy or appears to be undisturbed. Alternative sign locations may be considered if the location is believed to be highly sensitive.
4. If the proposed sign location cannot be demonstrated to have been previously disturbed, the typical course of action will be to either have it archaeologically tested or, if the potential for significant deposits is considered slight, have excavations for the sign installation monitored by an archaeologist. This may require hand rather than machine excavation of the pit for the sign foundation. The results of any archaeological investigation (testing or monitoring) should be documented in a report prepared in accordance with New Jersey Historic Preservation Office guidelines.
5. All archaeological finds and artifacts recovered during sign installation must be reported to the New Jersey Historic Preservation Office and the New Jersey State Museum.
